G-COMBO PFAS SERIES

Galene's G-Combo PFAS Series is a four-stage whole-home system that combines:

- Sediment filtration
- Granular carbon filtration
- Salt-free softener alternative for hard water control
- Specialized PFAS-reduction resin
- Optional UV system

Benefits

- No salt and no electricity required for the base system
- Improves water clarity, taste, and odor
- Helps reduce exposure to unwanted water contaminants
- Helps limit mineral scale buildup in pipes and appliances
- **KDF-55:** Placed in the carbon tank's top basket to help reduce chlorine and certain heavy metals, control bacterial growth within the media, and extend carbon life.
- Low maintenance with backwash capability

Designed to reduce

- PFAS ("forever chemicals")
- Dirt, rust, and sediment
- Chlorine and chloramines
- Unwanted color, taste, and odor
- Certain disinfection byproducts and VOCs
- Certain pesticides and insecticides
- Scale buildup (hard water control)
