GALENE

Clean Water Every Tap Every Time

GC SERIES

Galene's GC Series is a two-stage whole-home filtration system that combines:

- 5-micron sediment pre-filter
- Carbon filtration

Benefits

- Helps reduce exposure to unwanted water contaminants
- Improves water taste, odor, and clarity
- **KDF-55:** Placed in the carbon tank's top basket to help reduce chlorine and certain heavy metals, control bacterial growth within the media, and extend carbon life.
- Low maintenance
- Manual backwash capability

Designed to reduce

- Dirt, rust, and sediment
- Chlorine and chloramines
- Unwanted color, taste, and odor
- Certain pesticides and insecticides
- Volatile organic compounds (VOCs)

The manual backwash valve helps flush trapped particles from the carbon bed to support filtration performance.
